

Angry Birds Project

Mrs. O'Mara 04/05/17

What/Who

Choose a 3-person team.

What will you be doing?

- You will make a poster that answers the questions on the project sheet.
- You might have to work without your partners while your partner(s) take the Quadratics test tomorrow.
- You will share the SAME grade.

How will you be graded?

A (Excellent): You have proved, through the evidence on your poster, that you can use quadratic equations in context, and have went above and beyond in the presentation on your poster.

B (Good): You have proved, through the evidence on your poster, that you can use quadratic equations in context.

C (Fair): You have shown, through the evidence on your poster, you can partially use quadratic functions in context.

D (Needs Improvement): It is unclear about whether or not you can use quadratic functions in context, due to lack of evidence, but you completed a poster.

F (Needs Improvement): Your poster is incomplete.

Criteria for Success

- ✓ All work must be shown and answers clearly labeled
- ✓ Graphs should be done on graph paper with axes clearly labeled
- ✓ Graphs should be large (one per page) and show only the first quadrant
- ✓ Drawings of each bird should appear on the graphs

You may use one laptop per group.

BE SURE TO ANSWER THE QUESTION FOR EACH BIRD!
